

**When people first saw an image of
the earth from space
it changed the world for ever.**

**Seeing the whole system
creates new insights
new understanding
new possibilities.**

See the whole system of relationships in your team and change your world

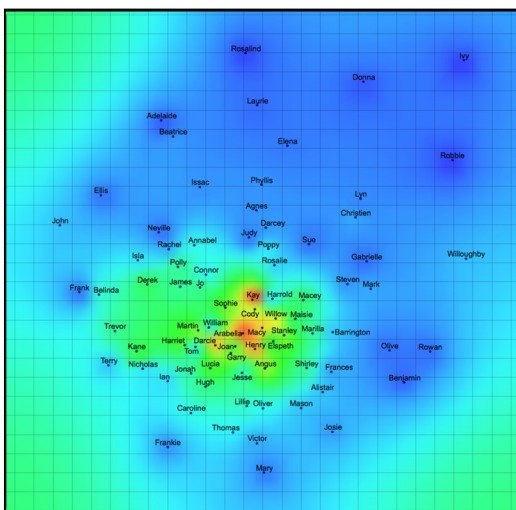

Visualise human systems with Connection Scan

Organisations are systems of people who interact and are interdependent. Real people in real relationships with all the complexity and misunderstandings that make us human. And sometimes these relationships get stuck in repeating patterns – the dance goes on but the music has changed. What worked before no longer fits the environment, but the relationships are stuck.

Like the impact of seeing the entire planet for the first time from space, a complete visual representation of the team's relationships allows member to step out of their system and see how everybody is connected.

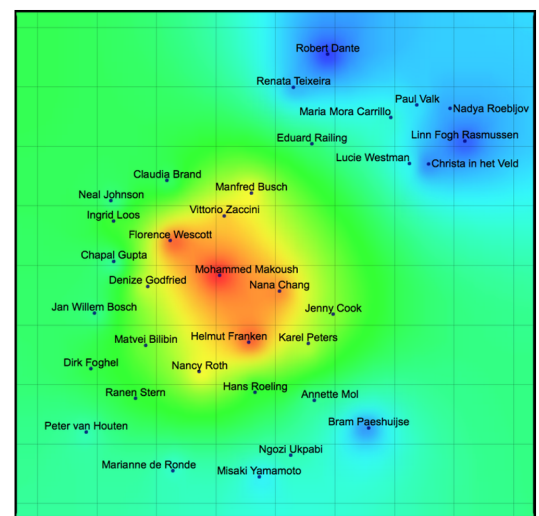

For the first time team members get the opportunity to see their world from an outside perspective. This perspective triggers a new and different way of thinking about themselves. The insights are transferable to their day to day work and sustainable.

Thus we enhance the potential of the changing organisation as opposed to the changed organisation.

Scan of who helps whom in a department.

People who help the most are coloured red and those who they help most frequently are closest to them.

Scan of communication in medium sized team

People who communicate the most are coloured red and those communicate with most frequently are closest together.

Certification training

In the two-day certification course you will learn to:

- Understand and explain the theory behind Connection Scan
- Know when and how to use Connection Scan whilst working with teams, organisations or networks
- Learn to use the Connection Scan Viewer to generate scans, work with scans in front of an audience and produce reports
- Develop the right questions for Connection Scan
- Read and interpret scans
- Use the toolbox to facilitate fruitful dialogue about scans to encourage the development of more effective communication and collaboration
- Run experiential exercises with teams and groups
- Use Connection Scan to promote your business
